1. What is the Big O notation from the following code?

```
function countVowels(word) {
    var vowels = ['a', 'i', 'e', 'o', 'u'];
    var count = 0;
                for (var i = 0; i < word.length; i++) {
        for (var j = 0; j < vowels.length; j++) {
            if (word[i] === vowels[j]) {
                count++;
            }
        }
    }
    return count;
}
```

Time complexity = O(n)

```
function itemInList(check, list){
        for (var i = 0; i < list.length; i++){
                if (list[i] === check) return true;
        }
        return false;
}
```

Time complexity = worst case O(n)  base case O(1)
